

RISK ASSESSMENT FORM - MANAGING HEALTH AND SAFETY

Academy:		Prepared By: C Leach Completed By:	Date: 04-04-2022
Activity Workplace: Novel Coronavirus (COVID-19) Revision: 23 04-04-2022 Guidance: Living safely with respiratory infections, including COVID-19 Published 1 st April 2022. People with symptoms of a respiratory infection including COVID-19 Published 1 st April 2022. COVID-19: guidance on protecting people defined on medical grounds as extremely vulnerable Published 1 st April 2022		Manager:	
Transmission / Spread of Respiratory Infections Including Novel Coronavirus (COVID-19) Breathing in air when close to an infected person who is exhaling small droplets and particles that contain the viruses. Small droplets and particles that contain viruses land on the eyes, nose, or mouth, especially through splashes and sprays like a cough or sneeze. Touching eyes, nose, or mouth with hands that have the viruses on them.		Main Symptoms of Novel Coronavirus (COVID-19) Continuous cough High temperature (over 37.8 degrees) Loss of, or change to the sense of smell (anosmia) Respiratory Infections and Milder Symptoms of Novel Coronavirus (COVID-19) Headaches, fatigue & lethargy, sore throat, muscle aches; shortness of breath, tummy upset / diarrhoea or vomiting.	

RISK ASSESSMENT FORM - MANAGING HEALTH AND SAFETY

Hazard		Initial risk				Action plan			Residual risk		
Details of hazard	Who is affected and how?	Likelihood	Consequence	Risk L/M/H	What controls are already in place	Further action required	By whom	By when	Likelihood	Consequence	Risk L/M/H

Transmission / Spread of Germs and Novel Coronavirus (COVID-19)

Effects
Mild flu symptoms
Respiratory infection
Breathing difficulties
Asthma
Fatality

RISK ASSESSMENT FORM - MANAGING HEALTH AND SAFETY

1. **R23** Staff with mild symptoms such as a runny nose, sore throat, or mild cough, who are otherwise well, can continue to attend work.

Staff who have COVID-19 main symptoms, who are unwell and have a high temperature are advised through verbal and written communication including signs that they should avoid contact with other persons and remain at home when possible until they feel well enough to attend and their temperature has returned to normal.

2. **R23** Pupils with mild symptoms such as a runny nose, sore throat, or mild cough, who are otherwise well, can continue to attend school. Pupils who have COVID-19 main symptoms, who are unwell and have a high temperature are advised through verbal and written communication including signs that they should avoid contact with other persons and remain at home when possible until they feel well enough to attend and their temperature has returned to normal.

3. **R23** Staff, parents, visitors and contractors are reminded through verbal and written communication including signs they should avoid contact with other persons and remain at home when possible for 5 days after the day of a positive LFD test result.

3A. **R23** Parents are reminded through verbal and written communication including signs that pupils should avoid contact with other persons and remain at home when possible for 3 days after the day of a positive LFD test result.

4. Regular briefings of GOV.UK

To be completed by School

RISK ASSESSMENT FORM MANAGING HEALTH AND SAFETY

Transmission / Spread of Germs and Novel Coronavirus (COVID-19)

Effects
Mild flu symptoms
Respiratory infection
Breathing difficulties
Asthma
Fatality

1. School isolation locations have a supply of disposable tissues, a foot operated bin with hand sanitizer, disinfectant wipes, sink with liquid soap and disposable hand towels or hand sanitiser 60% alcohol, face masks with an FFP2 or FFP3 rating where available or fluid resistant surgical masks, latex free disposable gloves, disposable aprons, face visor or safety goggles

2. Isolated pupils to use a separate bathroom if possible.

3. R23 Isolated pupils reminded

a. not to touch people, surfaces and objects

b. cover their mouth/nose with a tissue when they cough or sneeze

c. put used tissues in a bin or in a bag or their pocket for disposing in a bin later

d. if tissues are not available to cough and sneeze into the crook of their elbow

e. wear a face covering when possible

4. Emergency assistance is called immediately if the pupil's symptoms worsen, and they require further medical care.

5. If direct personal care is needed and staff cannot maintain a distance of two metres staff to wear:

a. FFP2, FFP3 tight-fitting face mask where available or fluid resistant surgical face mask.

b. face visor or goggles to be worn if the isolated person is coughing, sneezing, vomiting or spitting.

Asthma
Fatality

RISK ASSESSMENT FORM

MANAGING HEALTH AND SAFETY

1. **R23** Staff who have COVID-19 symptoms and have access to a LFD test are required to test daily. If a positive inform a member of SLT.

2. **R23** Following a positive LFD test result staff should for 5 days and pupils should for 3 days from the day after they took a test avoid contact with other persons.

3. **R23** Staff and pupils after the stipulated contact avoidance period can resume contact if they feel well and do not have a high temperature (if they had one)

4. **R23** Staff who have tested positive for COVID-19 should avoid meeting people at higher risk of becoming seriously unwell from COVID-19, despite vaccination, for 10 days after the day the test was taken.

5. Where required, relevant parents and staff are informed of the confirmed case; however, the name of the individual is not shared.

6. Evidence of negative test results or other medical evidence is not required before admitting individuals back to school after isolation.

7. **R23** During the 5 days after a positive test result the following steps should be taken to reduce the chance of passing on COVID-19 to others:

a. wear a well-fitting face covering made with multiple layers or a surgical face mask

b. avoid crowded places such as public transport, large

HIGH

1. Transport arrangements discussed with providers, SBMAT and parents.

2. **R23** Medics to be contacted as far as possible to ensure transport providers:

- inform drivers to avoid contact with others and try to remain at home when displaying main COVID-19 symptoms or have tested positive in the last 5 days not including the day of the test
- carry out cleaning of vehicle interiors before hire
- inform drivers of good hand hygiene rules to follow,
- inform drivers of good ventilation rules to follow by opening windows or using air conditioning.

3. Thorough clean of the school minibus interior before and after use and clean of frequently touch surfaces during use.

4. **R23** Staff and pupils who are unwell, show COVID-19 main symptoms and have a high temperature before setting off must not travel. Follow staff, pupils showing Coronavirus infection (COVID-19) or virus symptoms and have a high temperature section of risk assessment.

5. Staff and pupils reminded to follow good hand hygiene rules and wash or sanitise hands before entering vehicle and again after travel.

6. Through ventilation of the school minibus using fresh air (from outside the vehicle) maximised by opening windows and ceiling vents.

RISK ASSESSMENT FORM - MANAGING HEALTH AND SAFETY

The level of risk is calculated by:

The likelihood

x

The Consequence

- 1- Very unlikely
- 2- Unlikely
- 3- Fairly likely
- 4- Likely
- 5- Very likely

- 1- Insignificant (no injury)
- 2- Minor (minor injury needing first aid)
- 3- Moderate (up to 3 days absence)
- 4- Major (more than 3 days absence)
- 5- Catastrophic (death)

Risk rating:

1 – 4	Low (acceptable)	No further action required
5 – 9	Medium (adequate)	If risk cannot be lowered any further, consider risk against benefit. Monitor and look to improve at next review
10 – 16	High (tolerable)	Identify further control measures to reduce risk rating. Seek further advice e.g. line manager, H&S team, etc.
17 - 25	Very High (unacceptable)	Do not undertake the activity. Implement immediate improvements
