Close contact means:

- direct close contacts - face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin)
- proximity contacts - extended close contact (within 1 to 2 metres for more than 15 minutes) with an infected individual
- travelling in a small vehicle, like a car, with an infected person

The level of risk is calculated by:

The likelihood

x

The Consequence

- 1- Very unlikely
- 2- Unlikely
- 3- Fairly likely
- 4- Likely
- 5- Very likely

- 1- Insignificant (no injury)
- 2- Minor (minor injury needing first aid)
- 3- Moderate (up to 3 days absence)
- 4- Major (more than 3 days absence)
- 5- Catastrophic (death)

Risk rating:

1 – 4

Low (acceptable)

No further action required

5 – 9

Medium (adequate)

If risk cannot be lowered any further, consider risk against benefit. Monitor and look to improve at next review

10 – 16

High (tolerable)

Identify further control measures to reduce risk rating. Seek further advice e.g. line manager, H&S team, etc.

17 - 25

Very High (unacceptable)

Do not undertake the activity. Implement immediate improvements
